

Mid to Early High Plains Placement Guide

Primary Hybrids

Hybrid	Maturity	% of Acres	Placement	Harvest Timing
5032 DG2Pro	100 RM	up to 20%	Primarily irrigated, strong fit for western and northern plains environments. Good Goss' tolerance and excels on sand.	Mid to Late Harvest
5353 G2Pro	103 RM	up to 20%	Great fit for western and northern plains environments. Good stress tolerance and heat tolerance for maturity. Good Goss' tolerance and has shown high yields on sand.	Mid to Late Harvest
5437 3000GT	104 RM	up to 20%	Great early hybrid for heavy or light ground, or sand, irrigated or dryland, medium tall plant and ear height for early corn. Maintains really good harvest appearance and intactness. It's done well consistently over the past several years.	Mid Harvest
5558 G2Pro	105 RM	up to 20%	Top yield potential for maturity. Good choice irrigated and combines good plant height and drought tolerance for dryland. Moves south well for maturity and has good Goss' tolerance.	Early to Mid Harvest
5732 GT/CB/LL	107 RM	up to 15%	New, combines reliable agronomics with high yields. Use irrigated or dryland. Good ear flex, plant height, and above average tolerance to Goss' wilt. Liberty tolerance provides another herbicide option.	Mid-Late Harvest
5812 DG2Pro & GSS	108 RM	up to 20%	High yield potential for this maturity. Good ear flex. Moderate plant size. Flexible across soil types and good tolerance to Goss' wilt.	Mid Harvest
5845 G2Pro	108 RM	up to 15%	New, delivers top yields on high producing fields. Use irrigated or on less drought prone dryland. Prefers well drained fields and not ideal for stress prone irrigated sand.	Mid Harvest
5909 G2Pro	109 RM	up to 20%	New, top performer for this maturity. Good ear flex and moderate plant size. Works irrigated or dryland. Flexible across soil types and good tolerance to Goss' wilt.	Mid-Harvest
5940 G2Pro, VT3Pro, RR2, & conventional	109 RM	up to 20%	Top yield potential for this maturity. Good plant height for terraces and excellent canopy. Good ear flex. Flexible across soil types and good irrigated choice.	Mid to Late Harvest
6022 GSS & G2Pro	110 RM	up to 20%	Defensive hybrid with high yield potential. Use dryland or irrigated. Good on Goss' and other diseases. Good on saturated and high pH. Likes to be planted at higher populations.	Mid to Late Harvest
6149 G2Pro	111 RM	up to 15%	New Defensive hybrid addition with top dryland yields. Strong choice for fields with drought prone and high yield areas. Can be planted thinner due to excellent ear flex. Showed good tolerance to saturated fields.	Mid Harvest
